

MASSACHUSETTS WATER RESOURCES AUTHORITY

NOTICE TO ABUTTERS

Arlington

The Massachusetts Water Resources Authority (MWRA) is planning to upgrade water transmission pipes in your area. As part of the design effort, MWRA has hired Green International Affiliates, Inc. and other firms to perform sub-surface exploration activities on/near existing pipelines or in areas where new water pipes could be constructed.

The soil boring and test pit activities involve blocking off a small area of the road with a truck and a boring rig, digging and drilling down to a depth of 15 to 35 feet and removing the soil samples. At each location the work will take 4-5 hours. MWRA has 8 sites planned for Arlington. The locations are listed on the back of this flyer.

Work will begin the week of October 29, 2012 and occur between 9AM and 3PM, Monday through Friday. Construction Zone Safety Plans, including local police details in certain locations, will be provided for traffic control, and ensuring worker and general public safety in each area.

If you have any concerns or questions, please contact:

Jeff McLaughlin, MWRA at 617.660.7976 or via email at
Jefferey.McLaughlin@mwra.state.ma.us.
